

## FINDING FRACTIONS SHOWDOWN

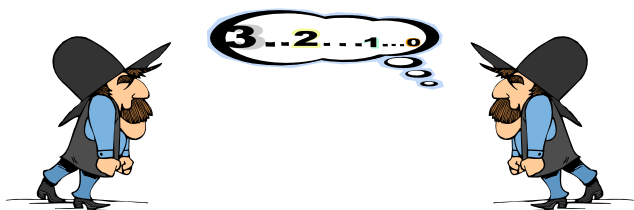

**DIRECTIONS:** All players need a small chalkboard or whiteboard. The first leader picks up a card. Without showing it to the others, he/she reads the sentence aloud. Everyone writes their answer on their board without talking. As they finish writing, they place their boards face down. When all the boards are down, the leader says “Showdown!” and everyone shows their answer. Team members discuss their answers and try to come to an agreement about the correct answer. The leader writes the answer on the task card so the teacher can check it as he or she moves about the classroom. For the next round, a new student on the team becomes the leader.
